

Zultys & Bandwidth.com Help Business Customers Kick Legacy Telecom to the Curb

Zultys IP PBX's now work with Bandwidth.com's Nationwide SIP Trunks

Sunnyvale, Calif. – June 2, 2009 – Zultys and Bandwidth.com share a vision: both companies are committed to providing SIP-based IP voice in order to save businesses money and ensure high-quality, reliable voice service. Now, the Zultys MX family of IP PBX servers interoperates with Bandwidth.com's nationwide SIP Trunking service.

Bandwidth.com bundles SIP, short for Session Initiation Protocol, with e911 and other services in what's known as "SIP Trunking" – essentially, VoIP for business. The pre-tested interoperability of Zultys' PBX products and Bandwidth.com's VoIP network enables businesses to achieve the full benefits and cost-savings of business VoIP. Bandwidth.com's nationwide network coverage means customers with multiple sites can link their locations coast-to-coast with one trusted voice provider.

Zultys' eight years of experience producing pure SIP IP-PBX products, combined with Bandwidth.com's dedicated IP voice network, cuts out points of failure from legacy technology that hybrid networks must work around. End-to-end SIP solutions allows customers to kick legacy analog technologies to the curb and enjoy the benefits of business VoIP.

"We've demonstrated that Zultys' pure SIP PBX servers work great on Bandwidth.com's new nationwide CLEC network," said Todd Barr, VP of Marketing for Bandwidth.com.

"We built our network for SIP, so it's a great fit that eliminates legacy technology to save businesses time and money."

"It's great to work with Bandwidth.com, one of the nation's premier ITSPs, to support our customers and resellers with an end-to-end, pure SIP solution," said Steve Morrison, VP

of Product Management at Zultys. “We believe in going the extra mile to support our channel and their customers with complete packages to address their pain points. Proving interoperability with Bandwidth.com’s SIP Trunking service makes this possible.”

About Bandwidth.com

Bandwidth.com emerged in 1999 and rapidly gained a place as the champion of small- and medium-sized businesses by helping over 4,500 customers save money on voice and data services. As a complete communications provider, Bandwidth.com offers IP voice (VoIP), broadband Internet and hosted VoIP, powered by our nationwide, 100% IP voice network and supported by in-house, 24/7/365 customer service.
