

WEB CONFERENCING THAT MAKES SENSE Integrated with Zultys' award winning MXIE Unified Communications client

4-in-1 Outstanding Value

The **MXmeeting™** 4-in-1 appliance provides four solutions in one unit:

- Web conferencing – sales presentations, product demos, interactive collaboration
- Web Seminar – seminars for view-only attendees, no download
- Remote Support – remote desktop support for PCs and Macs
- Remote Access - access to office or home PCs from anywhere anytime

M200/M500

MXmeeting™

ALL BENEFITS, NO DRAWBACKS

- Integration with MXIE
- No monthly fees
- Easy to deploy, one-time 10 – 30 minute installation
- Hardened on-premise security
- No IT maintenance needed. Firmware updated automatically
- Full customization. APIs for integration with applications and websites

Pays for itself in 4-6 months!

As compared to

Hosted Solutions

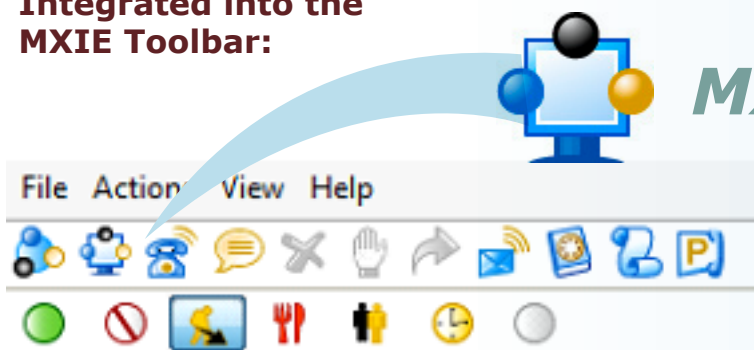

BENEFIT	DRAWBACK
Easy to deploy	Monthly fees
No IT maintenance	Weak security
	No customization
	No integration

* ***System/Function subscription fees***

Software Only

BENEFIT	DRAWBACK
On-premise security	Difficult to set up
No monthly fees	High up-front cost
	Ongoing maintenance

Integrated into the MXIE Toolbar:

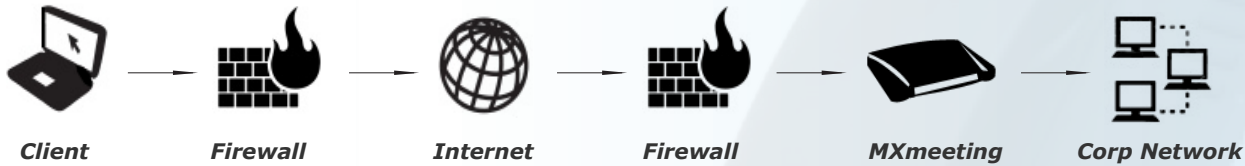

MXmeeting™

Integrated audio conferencing service*

You own it, you control it!

MXmeeting™ is a web-conferencing platform that fully integrates with the Zultys MXIE Unified Communications client application. You can launch a multi-party web-conference with the touch of a button from your PC, Mac or even from your Smartphone. The 4-in-1 MXmeeting appliance integrates into your network and allows attendees to join a collaborative web-conference without even having special software installed on their computer. Click to start an interactive Web-Conference, seminar or remote desktop support...all with or without a 150 port Voice Conference Bridge.

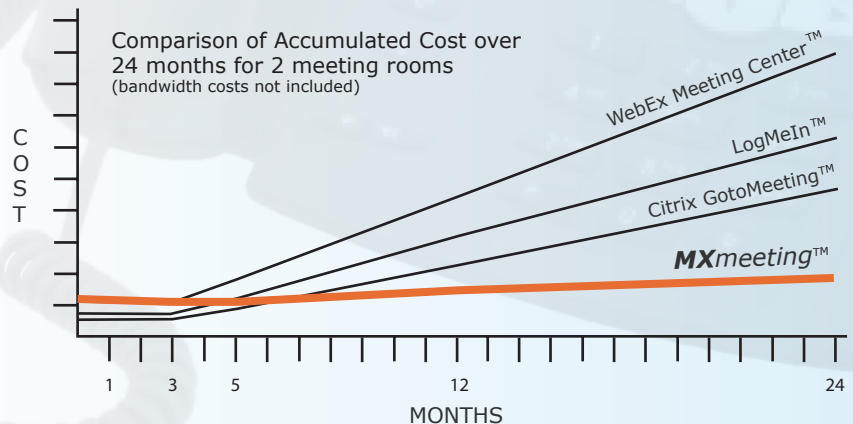

You can brand the system and integrate it with your applications and websites. You can place "Host Meeting" and "Join Meeting" buttons on any external/internal web page, or windows based applications such as audio conference or CRM systems.

Can be placed outside, behind or on the DMZ of your Router/Firewall

Capacity Range:

MXmeeting Appliance	Included Capacity	Maximum Capacity
M200	2 Rooms, 10 Users	4 Rooms, 20 Users
M500	5 Rooms, 20 Users	20 Rooms, 100 Users

Note: General bandwidth requirements: 50kbps-160kbps per standard presentation slide per MXmeeting web conference session attendee.

UNIVERSAL ATTENDANCE Anybody can join the meeting

The amazing Universal Attendance technology enables anyone with a modern browser, on any platform, to join a meeting. No download of any kind is required. The attendee is "view only" and can see the presenter's screen in a browser with similar speed as the fully interactive client attendee that requires a download.

Just think - no firewall, antivirus products, lockdown computers, or unsupported platforms can keep your key meeting participants from joining. And, it is fast - just 5 seconds to join. No more waiting 10 and 15 minutes to start your meeting while everyone works to get clients downloaded and connected.
