Advanced IP PBXs and UC Platforms Making VoIP Work For Your Business

All-in-One Solution

Zultys' feature-rich IP PBXs allow the use of SIP, PSTN or T1/E1/PRI trunks and deliver a comprehensive feature set that adapts as business demands change, allowing companies to deploy what they need today, with an easy expansion path to handle tomorrow's needs as well.

Overview

The Zultys MX Family is an Enterprise class IP PBX that combines best of breed UC features in one efficient appliance. Based on Linux open standard SIP (Session Initiated Protocol), Zultys packs its servers full of business enhancing features that provide a wide range of enterprise-class Unified Communications services in a single, energy efficient box that lets companies deploy the systems that will help them meet their business needs.

- Lower-cost VOIP calling
- Simple to deploy and maintain
- Improved Collaboration
- Company-wide Presence and Communications
- Support for 3rd party phones and applications

Available features include:

- Advanced IP-PBX
- Inbound Call Center with Real-time Wall Board and Reporting
- Visual Voice Mail
- Built in Fax Support
- Presence & Instant Messaging
- MS Exchange Integration
- Unified Messaging
- Automated Attendant with Interactive Voice Response
- N+1 redundancy
- Seamless multi-site integration
- Unified client application for Windows, Mac & Linux
- Centralized management
- Busy lamp field /Key system emulation
- Voice compression
- Historical archiving of call recordings, instant messages, voice and fax mail
- All Phones can support Teleworkers without VPN
- Find Me/Follow Me/Twinning

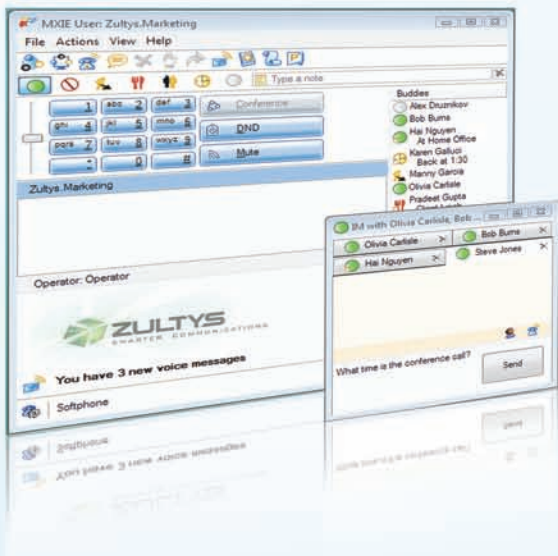

A leader in open standards SIP-based Enterprise communications since 2001, Zultys' integrated communications systems support customers in over 110 countries in 19 languages

MXIE

Unified Communications Client for Windows, Mac and Linux

The Media eXchange Interface for End Users' client (MXIE) is an intuitive, easy to use Presence and Communications tool. This "One Click to Contact" desktop application manages all of the functions in the MX platform. It lets people see the availability of anyone in the company — whether they are on a mobile phone or a desk phone — and launch an email, phone call, fax, IM, voice mail or a conference session with a simple mouse click.

Available features include:

- *Initiate and control calls via mouse, keyboard, telephone or Softphone*
- *View presence indicator and notes of all users*
- *Collaborate via Instant Messages*
- *Review and manage voice mails and fax messages.*
- *MS Outlook address book integration*
- *Screen pops display incoming caller information*
- *ScreenDial™ lets you call from any webpage, document or electronic record*
- *MXmobile™ extends Unified Communications to your cell phone*
- *Record calls from any phone*
- *Single log-in for Users, Operators and Contact Center Agents*
- *Create Call Handling Rules to manage call routing*
- *Supported on Windows, Mac, Linux and thin clients*
- *Integrate with CRM and TAPI compliant applications*
- *Call Attached Data for Wrap-up and Account Codes, and other notes*
- *MXconnect™ lets you make any phone your business phone*

MXmobile™

Unified Communications for Mobile Devices

MXmobile™ is a mobile presence and communications client for RIM BlackBerry and other devices that delivers a complete Unified Communications experience to mobile workers, allowing them to stay fully connected to the entire company. MXmobile integrates mobile workers into the corporate Voice and Unified Communications system, providing critical tools such as presence, visual voice mail, internal extension dialing and corporate directory access. MXmobile also provides Least Cost Routing for mobile devices, which could cut thousands of dollars from your company's phone bill.

- Mobile Presence and Instant Message
- Mobile Privacy
- Single Number Contact
- Least Cost Routing
- Corporate Directory and PBX Access
- Visual Voicemail
- Call Alerts

MXconference™

Affordable Audio Conferencing Bridge

The MXconference™ private audio bridge service feature for Zultys' IP PBXs provides a high quality, affordable alternative to external audio conferencing services. MXconference is a software feature that requires no additional hardware. It eliminates costly pay-as-you-go fees for external conferencing services and provides a convenient, secure conference capability that fully integrates with the MXIE Unified Communications client and MXmeeting web conference system.

- Requires no additional hardware
- Supports up to 60 participants and 20 conference rooms
- Integrated with Outlook and other email systems
- Uses the MXIE graphical user interface for easy conference set-up and management

MXgroup™

Connect All Your Locations via an Integrated UC System

The MXgroup option allows multiple MX250 and MX30 systems to be interconnected over IP to form a single company-wide unified communications system. Each MXgroup can support thousands of users at up to 128 locations and provides global presence, toll bypass site-to-site calls, secure communications and interactive collaboration across the entire group, wherever they are located – whether it's in the same building or in another country. MXGroups allows multiple MXs on your WAN to synchronize together (distributed architecture) and then work as if they are one MX, offering automatic failover between locations, survivability and high availability for the enterprise.

- Secure Enterprise-wide Unified Communications
- Global Presence and Single Number Contact
- Seamless Roaming Between Sites
- Unique Distributed Architecture
- Survivability and Disaster Recovery
- Easy Set-up and Administration
- Supports Thousands of Users
- Extends Unified Communications to 128 locations

MXmeeting™

Web Conferencing Made Simple

MXmeeting is a web-conferencing platform for up to 200 interactive participants (as well as providing a 150 port audio bridge) that fully integrates with the Zultys MXIE Unified Communications client. You can launch a multi-party web-conference with the touch of a button from your PC, Mac or even from your Smartphone. The feature-rich MXmeeting appliance plugs right into your network and allows people to join a collaborative web-conference without even having special software installed on their computer. Conduct interactive web-conferences and seminars with real-time video of the presenter, and provide remote desktop support and remote access. MXmeeting delivers real bottom-line benefits.

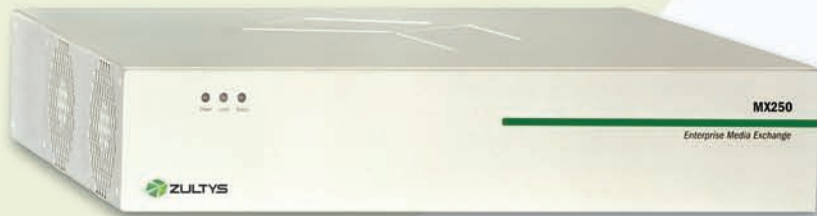

- Web conferencing – sales presentations, product demos, interactive collaboration
- Web seminar with video – seminars for view-only attendees, no download
- Remote support & access – reach PCs and Macs anywhere, anytime
- Remote print and file sharing – print and share documents remotely to anyone participating in a meeting session

MXmeeting™

One click access. Easy, Intuitive, Accessible

Each Zultys MX server is a complete multi-feature IP PBX ready to support a maximum user capacity. All software is pre-installed. Capacity and features are enabled by purchasing a valid license key. This allows businesses to quickly deploy the services they need today, while allowing them to easily expand as their businesses grow – without needing more servers.

MX250

- **The MX250 supports up to 60 Trunks and 250 users per MX250, and can expand significantly**
- **19" 2U self contained appliance**
- **MXgroup configuration supports up to 10,000 users (with up to 1000 users per local Cluster)**
- **3 x Universal expansion slots for E1, T1, PRI ISDN, BRI ISDN, Analog FXO and Analog FXS interface cards**
- **RAID-1 hard-disk mirroring and N+1 redundant configurations**
- **Based on open standards: SIP, Linux, VoiceXML, TAPI, SQL**
- **Optional battery back-up**
- **Efficient design reduces energy consumption**
- **Supports 60 SIP Trunks with no licenses needed and no external Gateways**

MX30

- **The MX30 supports up to 10 Trunks and 30 Users**
- **Compact 8.3" x 8.3" x 2.0" (210mm x 210mm x 50mm)**
- **Deploy as standalone system or as part of MXgroup**
- **Single expansion slot for 4 port FXO, 10 channel PRI/T1/E1 or BRI ISDN**
- **Connect directly to SIP based ITSP to reduce call costs**
- **Expandable to support MXgroup multi-site clustering for up to 10,000 users**
- **Based on open standards: SIP, Linux, VoiceXML, TAPI, SQL**
- **Efficient design reduces energy consumption**
- **Supports 10 SIP Trunks with no licenses needed and no external Gateways**

ZIP 5-series Advanced SIP Standard Enterprise IP Phones

57i & 57iCT The ZIP 57i and 57iCT deliver advanced features in an elegant design ideal for demanding operators and corporate executives. The 57iCT includes an integrated cordless handset

- Full duplex speakerphone
- Dual 10/100 Ethernet ports
- Modular headset connector
- 12 customizable soft keys
- 802.3af PoE & AC power
- 144 x 128 pixel backlit display
- DECT cordless mobility handset
- Hearing aid compatible handset
- Wideband audio support
- Embedded XML browser

55i The ZIP 55i provides an enhanced user experience through a generous screen and programmable keys

- Full duplex speakerphone
- Dual 10/100 Ethernet ports
- Modular headset connector
- 6 soft & 6 programmable keys
- 802.3af PoE & AC power
- 144 x 75 pixel backlit display
- Enhanced directory access
- Hearing aid compatible handset
- Wideband audio support
- Embedded XML browser

51e/53e Highly functional ZIP 53e covering the busy office environment and ZIP 51e for low call volume applications

- Full duplex speakerphone
- Dual 10/100 Ethernet ports (53e)
- Single 10/100 Ethernet port (51e)
- 8 programmable keys
- 802.3af Power over Ethernet (53e)
- AC Power pack (51e incl, 53e optional)
- 3 line x 16 character display
- System directory access
- Hearing aid compatible handset
- Wideband audio support
- Embedded XML browser

53i The ZIP 53i is perfect for cubicle environments or enclosed offices and is a good fit for "power users" and low volume users alike

- Full duplex speakerphone
- Dual 10/100 Ethernet ports
- 6 programmable keys
- 802.3af PoE & AC power
- Modular headset connector
- 3 line x 16 character display
- System directory access
- Hearing aid compatible headset
- Wideband audio support
- Embedded XML browser

536M/560M

The ZIP 536M and ZIP560M expansion modules increase the power and flexibility of the Zultys ZIP 5-series IP Phones, providing additional keys/LEDs for enhanced Busy Lamp Field (BLF) monitoring and feature access

The ZIP **536M** has 36 programmable keys with LED lamps in a small footprint. Compatible with ZIP 53i, ZIP 55i, ZIP 57i and ZIP 57i CT phones.

The ZIP **560M** has 60 customizable soft keys with LED's for Busy Lamp Field and feature activation. Paperless LCD key labelling. Compatible with ZIP 55i, 57i and 57i CT phones.

Zultys brings you all the benefits of advanced Unified Communications and IP Telephony through an efficient, affordable, and highly scalable family of SIP products and solutions designed for the needs of the SMB and Enterprise Customers.

About Zultys

Based on open standards, Zultys Inc., a Silicon Valley company founded in 2001, manufactures feature-rich VoIP Business Phone Systems that easily scale to thousands of users. Zultys makes your business needs our priority. Our solution supports Mac, Windows 32 or 64 Bit or Linux users and integrates features such as soft-phone, Find me-Follow me, Presence, Secure Chat, Tele-worker support, Inbound Contact Center, IVR, ACD, Call Recording, Fax Origination/Termination, Cell

Phone Twinning and much more. Zultys delivers on the promise of Unified Communication from open interfaces such as SIP to rich applications and networking. Not only is our solution cost effective, it also provides the highest energy efficiency with its compact single server all-in-one design. Zultys' distributed architecture also helps companies maintain high availability, while being simple to install, manage and scale. For more information, visit us at www.zultys.com.
