MXARCHIVE

MXarchive Enables Storage of All Your Important Data on a Dedicated, Secure Separate Server

Today's world of big data requires big data storage. Having your system server bogged down by thousands of megabytes of stored data can be detrimental to the speed, integrity, and security of the system. Zultys MXarchive is the solution to this problem.

When utilizing an MXarchive server, recorded data generated by the MX system will be downloaded from the MX to the archive for indefinite, secure storage. These records can then be accessed and viewed at any time using the MXarchive Viewer application.

ARCHIVABLE MEDIA TYPES

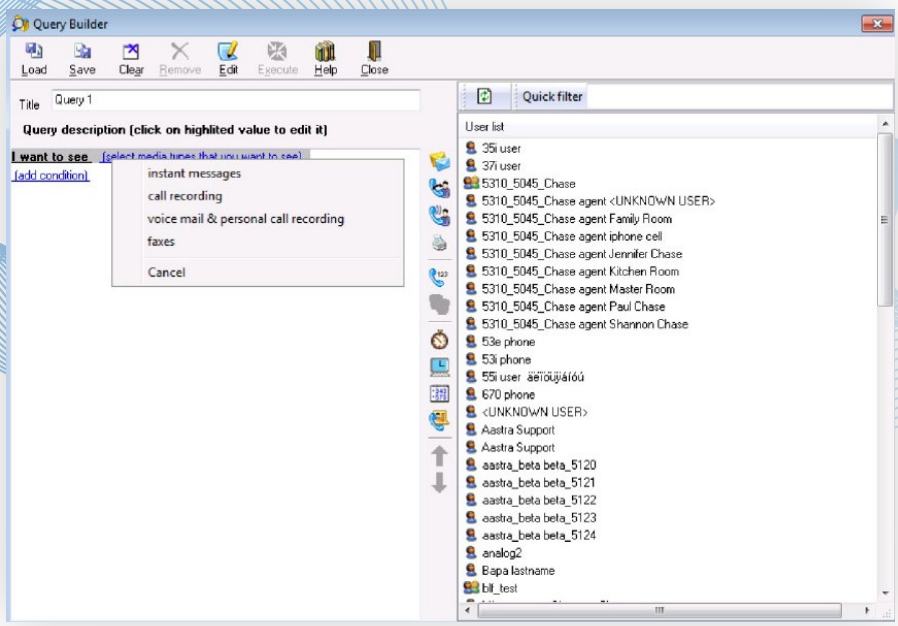

- **Instant messages/SMS**
- **Voicemails**
- **Automatically recorded calls**
- **On-demand call recordings**
- **Faxes**
- **Call Attached Data (CAD)**
