Packaging Contents

The following items are included in your package. If you find anything missing, contact your system administrator.

Assembling the Phone

1. Attach the stand, as shown below:

   ![Diagram of stand attachment]

   Desk Mount Method

   Note: The phone may also be wall mounted using the optional ZIP 47G wall mount bracket. Refer to wall mount installation guide for additional information.

2. Connect the handset and optional headset, as shown below:

   ![Diagram of handset and optional headset connection]

   Wireless Headset Adapter EHS 3xi

   Note: The headset or wireless headset adapter EHS 3xi may be purchased separately. The EXT port is also used to connect the optional ZIP 440M expansion module.

Note: We recommend that you use the accessories provided or approved by ZULTYS. The use of unapproved third-party accessories may result in reduced performance or damage.
3. Connect optional USB Adapter if supplied:

Note: The USB port can be used to connect a Bluetooth USB dongle or Wi-Fi USB dongle. The Bluetooth USB dongle and Wi-Fi USB dongle are optional and purchased separately.

4. Connect the network and power, as shown below:
There are two options for network and power connections. Your system administrator will advise you which one to use.

Note: The IP phone should be used with ZULTYS original power adapter (5V/2A) only. The use of a third-party power adapter may cause damage to the phone. If you are connecting a PC to your phone, we recommend that you use the Ethernet cable provided by ZULTYS. If inline power (PoE) is provided, you do not need to connect the power adapter. Make sure the switch is PoE-compliant per the IEEE 802.3af standard.

Startup

After the IP phone is connected to the network and supplied with power, it automatically begins a process of initializing on the network and downloading its configuration information. Contact your system administrator if the phone fails to register with the IP phone system.
Basic Call Features

Placing a Call

Using the handset:
1. Pick up the handset.
2. Enter the number, and then press the Send soft key or #.
   --Alternatively-- Enter the number and then lift the handset to initiate the call.

To configure a speed dial key:
1. Press the Menu soft key when the phone is idle, and then select Features -> DSS Keys.
2. Select the desired DSS key, and then press the Enter soft key.
3. Select SpeedDial from the Type field, select the desired line from the Account ID field, enter a label in the Label field and then enter the number in the Value field.
4. Press the Save soft key to accept the change.

To use the speed dial key:
Press the speed dial key to dial out the preset number.
**Voice Message**
Message waiting indicator on the idle screen indicates that one or more voice messages are waiting at the message center. The power indicator LED slowly flashes red.

**To listen to voice messages:**
1. Press ❌ or the **Connect** soft key.
2. Follow the voice prompts to listen to your voice messages.

**Customizing Your Phone**

**Call History**
1. Press the ▲ when the phone is idle, press ▼ or  ▲ to scroll through the list.
2. Select an entry from the list, you can do the following:
   - Press the **Send** soft key to call the entry.
   - Press the **Delete** soft key to delete the entry from the list.
If you press the **Option** soft key, you can also do the following:
   - Select **Detail** to view detailed information about the entry.
   - Select **Add to Contact** to add the entry to the local directory.
   - Select **Add to Blacklist** to add the entry to the blacklist.
   - Select **Delete All** to delete all entries from the list.

Note: Call History may also be viewed by pressing the **Directory** soft key, then select the History menu item.

**Contact Directory**

**To add a contact:**
1. Press the **Directory** soft key when the phone is idle, and then select **All Contacts**.
2. Press the **Add** soft key to add a contact.
3. Enter a unique contact name in the **Name** field and contact numbers in the corresponding fields.
4. Press the **Save** soft key to accept the change.

**To edit a contact:**
1. Press the **Directory** soft key when the phone is idle, and then select **All Contacts**.
2. Press ▲ or  ▼ to select the desired contact, press the **Option** soft key and then select **Detail** from the prompt list.
3. Edit the contact information.
4. Press the **Save** soft key to accept the change.

**To delete a contact:**
1. Press the **Directory** soft key when the phone is idle, and then select **All Contacts**.
2. Press ▲ or  ▼ to select the desired contact, press the **Option** soft key and then select **Delete** from the prompt list.
3. Press the **OK** soft key when the LCD screen prompts “Delete selected item?”.

Note: You can add contacts from call history easily. For more information, refer to **Call History** above.

**Volume Adjustment**
- Press during a call to adjust the receiver volume of the handset/speakerphone/headset.
- Press when the phone is idle or ringing to adjust the ringer volume.
- Press to adjust the media volume in the corresponding screen.

### Notes
FCC Statement
This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

About Zultys
Zultys is the global provider of a true all-in-one unified communications solution. Innovative, reliable and scalable, Zultys IP phone systems integrate voice, video, data and mobility in a single premise based appliance or in the cloud - to optimize collaboration for businesses of all sizes.

Zultys delivers a powerful, feature-rich communications system that is easy-to-use, deploy and maintain. Zultys is headquartered in Silicon Valley with offices around the world.
