Gigabit Business IP Phone
ZIP 43G

Quick Start Guide

WWW.ZULTYS.COM
Package Contents

The following items are included in your package. If you find anything missing, contact your system administrator.

Assembling the Phone

1. Attach the stand, as shown below:

Note: The phone may also be wall mounted using the optional ZIP 43G wall mount bracket. Refer to wall mount installation guide for additional information.

2. Connect the handset and optional headset, as shown below:

Note: The headset or wireless headset adapter EHS 3xi may be purchased separately.

Note: We recommend that you use the accessories provided or approved by ZULTYS. The use of unapproved third-party accessories may result in reduced performance or damage.
3. Connect the network and power as shown below:

There are two options for network and power connections. Your system administrator will advise you which one to use.

Note: The IP phone should be used with ZULTYS original power adapter (5V/600mA) only. The use of a third-party power adapter may cause the damage to the phone. If you are connecting a PC to your phone, we recommend that you use the Ethernet cable provided by ZULTYS. If inline power (PoE) is provided, you do not need to connect the power adapter. Make sure the switch is PoE-compliant per the IEEE 802.3af standard.

Startup

After the IP phone is connected to the network and supplied with power, it automatically begins a process of initializing on the network and downloading its configuration information. Contact your system administrator if the phone fails to register with the IP phone system.
Basic Call Features

Placing a Call
Using the handset:
1. Pick up the handset.
2. Enter the number, and then press the **Send** soft key or #. 
   --Alternatively-- Enter the number and then lift the handset to initiate the call.

**Notes**
**FCC Statement**
This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

**ISED Canada Statement**
This product meets the applicable Innovation, Science and Economic Development Canada technical specifications.

Ce produit répond à la innovation, des sciences et de Développement économique Canada spécifications techniques applicables.
