

Enterprise-Wide Unified Communications Made Easy: Hybrid, Cloud, and On-Premise Deployment

MXnetwork™ is a license-activated solution for Zultys IP phone system products. It allows multiple MX systems to be interconnected to form a single enterprise-wide Unified Communications system. Capable of connecting separate offices to function as a single enterprise, the MXnetwork feature works with all types of MX systems: the premise-based MX-E and MX-SE, as well as the cloud-based MXvirtual solution. Zultys Cloud Services is a fullyhosted platform that can network with any other MX system to ensure safe and convenient interoffice communication as well as disaster recovery and redundancy strategies in case of an emergency.

Unite All Locations & Mobile Workers

One collaboration platform for all employees

Single Admin Console

Simple to deploy, simpler to use

Cross-Site Redundancy

Pre-configure automatic failover or manually switch users and devices over to another system

Call Cost Savings

Reduce and control communications costs

Built-in Security

Communication between systems is encrypted

CUSTOMIZE YOUR DEPLOYMENT TO FIT SPECIFIC BUSINESS NEEDS
